Foods They Eat

Bearded dragons are omnivores. This means they eat both plants and animals. Bearded dragons eat vegetables such as kale and dandelion greens. They also eat crickets and mealworms.

Spiders are **arthropods** that have eight legs. Their fangs inject **venom** into their **prey**.

Baskins Creek Falls is a waterfall in the Great Smoky Mountains.

collection - when water falls back to the earth, it falls into oceans, lakes, rivers or land

condensation – water vapor in the air

evaporation – water vapor that rises and collects to form clouds

precipitation – water that falls from the sky

eggs.....4-5, 8, 10-11, 19

gills.....14-15

legs.....6, 12, 13-16

lungs...18

Insects

number of body parts	number of legs	number of eyes
